IS NEW CONCEPTION  
OF GENUS INVENTOR

Miss Knight Has Patented Many  
Improvements in Mill  
Machinery.

Probably the most popular conception of an inventor is a short thin man, with a big, bald head, staring eyes behind bulging spectacles, untidy apparel, the habit of sitting on the edge of his chair while he is explaining his inventions to prospective promoters, and a German accent, so when a reporter for The Washington Herald was sent to interview an inventor named Knight yesterday afternoon, he was given quite a jolt when a tall, white haired, dignified, soft-spoken, elderly woman was presented to him.

She is Miss Margaret E. Knight, of Boston, who came to Washington Saturday to make application for patents on a number of her latest inventions. Although sixty-eight years of age, and the patroness of eighty-seven devices, Miss Knight has not ceased from her labors and is still engaged in thinking up schemes to lighten the labor of mankind.

Her latest invention is a "sleeve valve motor." At her rooms, 119 High Street, Boston, she has worked out problems in mechanism which have stump many a masculine inventor and for reward has a comfortable fortune and a deal of satisfaction.

"I like to produce results rather than talk about them," said Miss Knight yesterday. "I do not make good material for newspaper copy."

Perhaps the most interesting thing about her is the way she started. When she was twelve years old and living with her parents at Manchester, N. H., she gleaned considerable knowledge of the machinery of the mills there. My first invention was produced by an accident. I witnessed one day in the mills. The steel tip of a rapidly moving loom flew off and injured an operator, so I thought up a device which would prevent the tip from coming off. In 1871 I invented a machine for making and folding paper bags, which is still in use. Most of my inventions are appliances for rubber, cotton, and shoe machines, but I have also invented steam, hot-air, internal combustion, and a good many other varieties of engines even including a gas turbine and a gas rotary engine. I just watch a machine work for a while and try to see something about it which could be improved. I often succeed and sometimes am able to work out a perfected method and patent it."

Miss Knight was involved in a law suit a short time ago over an engine application. She employed a Washington patent attorney to prepare a case for her case. She won it. In fact the cases which she does not win are few and far between.

PREPARING APARTMENT PLANS.  
P. R. White & Co. Making Drawings for \$200,000 structure.

Architects P. R. White & Co., 1242 New York Avenue Northwest, have plans in progress for an apartment house to be built in Fairmont Street Northwest at a cost of approximately \$200,000. It is to be built of brick and stone, five stories and fireproof. The owner is Harry Wardman.

New Cleveland Park House.  
Architects Kendall & Smith, Corcoran Building, are preparing plans for a two-story-half-story frame residence to be built in Cleveland Park for W. A. Kelley to cost about \$15,000.

Electric Elevators for Temple.  
The beautiful Scottish Rite Temple, now being erected at Sixteenth and S Streets Northwest, this city, will be equipped with two electric passenger elevators. They are being installed by the well-known Otis Elevator Company.

DEPOSITORS THREATEN BANK.  
Police Called to Protect Building Closed by Examiner.

New Orleans, April 15.—Hundreds of depositors to-day besieged the wrecked Teutonic Bank and Trust Company, which had been taken over by State Bank Examiner Young following the discovery of a shortage said to be \$205,000. So threatening were many of the angry depositors that police were called to guard the building. President E. F. Reuker, Chairman J. A. Gemile, of the finance committee, and former Assistant Cashier F. J. Brand are under arrest. Clark Steiner, former teller, committed suicide a number of months ago.

Will Install Marine Railway.  
A marine railway to be used in hauling the boats of the Potomac Red and Gun Club out of the water is to be installed at that organization's clubhouse, foot of Sixth Street Southwest. Capt. Riley Cumberland is to have charge of the railway when it is completed.

REAL ESTATE TRANSFERS.

Manufacturers to Meet.  
The National Association of Manufacturers will hold their seventeenth annual convention in New York City May 20, 21, and 22, 1912.

Repeating Electric Scoreboard.  
The Upton-Smoot Construction Company is erecting a steel scoreboard at the American League Baseball Park at a cost of \$1,000. This scoreboard will be operated by electricity, and will be a great improvement over the old board used in recent years.
